SUMMARY

Product / UX/UI Designer with 4 years of experience building and evolving digital products, including mobile apps and SaaS platforms. Led the full design cycle end to end, from research and requirement clarification to prototyping and launch. Developed and maintained design systems, reducing interface delivery time and enabling scalable product growth.

WORK EXPERIENCE

Product Designer **04/2025 – Present**

MyCar Group – *A digital ecosystem for car owners that brings together a marketplace, auto dealerships, and financial services*

- Sole designer of the Hyundai Trans Kazakhstan plant digitization: replaced manual operations with one system for desktop and industrial handheld terminals (100+ terminal and 40+ desktop screens), with a keypad-first, glove-friendly UI shaped by on-site research
- Own the Trade-in product end to end across the dealership network as its sole designer: researched the process on site and digitized the full flow — vehicle intake, inspection, documents and agreements — from discovery to release and ongoing improvements
- Designed new SaaS modules from scratch — compensation and performance management, and a used-car auction tool with a kanban board, analytics dashboards and role-based access — and keep improving the company's logistics platform

Product Designer **05/2023 – 01/2025**

Vlife – *a mobile super app and ecosystem that combines a loyalty program, a payment service*

- Contributed to a strategic mobile app redesign, focusing on aligning user flows with new business goals and improving overall interface consistency
- Executed end-to-end UX research, including in-depth user interviews and surveys
- Conducted moderated usability testing on high-fidelity prototypes, assigning tasks to users to evaluate the effectiveness of the new design
- Designed the UI/UX for an EV charging station interface
- Developed a cross-platform monitoring b2b system (Web/Mobile) for remote facility inspections, compliance tracking and real-time operational analytics

Product Designer **08/2021 – 02/2022**

Align – *implementation and maintenance of information security systems*

- Designed "Saturn" (GRC SaaS) from scratch, automating complex risk and incident management processes for information security departments.

HARD SKILLS

SaaS & B2B enterprise product design, information architecture, interactive prototyping, user research & interviews, usability testing, A/B testing, design systems (Figma variables, components), wireframing, cross-platform design (desktop & industrial handheld interfaces)

EDUCATION

Al-Farabi Kazakh National University, Associate Degree: Informational systems 2012

University of power engineering and telecommunication, undergraduate studies: computers and software 2016
